

Figure 2.5: Student Mathematics Learning Portfolio Ideas For All Grade Levels

Final Mathematics Learning Portfolio Reflection

- What is something you are most proud of?
- What was the hardest concept you encountered and how did you conquer it? What is the evidence of your progression?
- What is something you would do differently next time?
- Choose a performance task that you're most proud of and talk about how you used the mathematical practices to create a solution.
- Looking over your work from the beginning of the learning portfolio to the end, what evidence shows growth either in your mathematics processes or concept understanding?
- How will you use your mathematics learning portfolio going forward? Did you find the process valuable?
